WHITE EAGLE EDUCATION LTD

25.07. - 03.08.2024.

- Not only is London the capital of England, but it is also one of the leading trade, educational, cultural and sports centres, which is why it is often called the capital of the world.

- This program is the perfect way to experience the life and culture of Great Britain, to feel the heart beat of London and get to know its sights, all from the perspective of a British family. The students will be staying in double-bed and triple-bed rooms, and they will be attending a specially designed program which includes workshops of English language in museums and galleries. The accommodation is half-board, and the homes of the host families are in the 5th zone of London, which is 50 minutes away from the city centre by train.

Organised in a group, the students travel to the centre of London every day, where they visit the most famous tourist attractions, familiarize themselves with the stories about each of the locations, and upon return, they exchange the impressions with the host families. Saturday is designated for a trip outside London, and the program includes many other optional trips and tours. The program is intended for all children aged 12 to 18 who are seeking an adventure.
